

SWEET ALMOND

FACTORY

Dafisa was born in 2000 as a seed producer. The company prospered thanks to the support of its shareholders. That allowed the incorporation of new lines of activity: cotton ginning (2003), olive oil production (2008), almond processing (2017).

Currently, Dafisa has a strong industrial and logistics platform, and a qualified human team, which make Dafisa an ideal partner in all agricultural production aspects.

Years ago, the almond surface areas cultivation increased exponentially in the Guadalquivir Valley. From a traditional dry farming system located in marginal areas, it switched to a modern cultivation in fertile areas with the most advanced irrigation systems allowing a significant production increase.

In 2017, DAFISA decided to undertake the project of installing an almond shelling plant in order to meet the needs generated by almond plantations located in the nearest natural environment. The most technologically advanced almond processing machinery has been bought.

DAFISA S.A.

OUR PRODUCT

NATURAL ALMOND WITH SKIN

Natural almonds with skin are a great source of fibre.

Our delicious almonds are of the highest quality, unique in the market and characterized by:

- Being sold as monovarietal batches.
- Homogeneous batches.
- Traceability from the tree.
- Absence of bitter almonds guaranteed.
- Vacuum-packed in a controlled atmosphere.

DAFISA S.A.

ALMONDS

PRODUCTION LINE

The plantations made in the Guadalquivir Valley in the last years are highlighting with a large surface area and monovarietal. That give us the possibility of being able to carry out a traceability from the tree. This last aspect along with a rigorous control during the process led us to obtain the IFS certification. Therefore we can offer monovarietal, homogeneous batches with the required caliber by the customer and providing the most suitable product for the industry.

OUR VARIETAL

LAURANNE

Sweet grain and the most cultivated in the Guadalquivir Valley.

GUARA

One of the most widespread varieties during the last years.

SOLETA

Narrow and elongated grain.

BELONA

Rounded and large caliber grain.

*Other almond varieties are also available.

USES AND BENEFITS

Almond is one of the most nutritious and versatile nuts in the world. There are many uses and benefits of almond:

HEALTH

The rigorous scientific PREDIMED study highlights that the Mediterranean Diet based on extra virgin olive oil and nuts reduces the risk of suffering from cardiovascular diseases.

CULINARY

In the Andalusian gastronomy, people use the almond in several ways: cold soups, like white garlic soup, or in sweets, like nougat and marzipan. These recipes are part of the Al-Andalus legacy (10th century).

BEAUTY

Almond oil helps prevent skin cell ageing due to its vitamins B and E, and its minerals. In cosmetics, it is widely used to cure stretch marks during pregnancy.
